

Dexter for elementary schools

Account for parents and guardians

June 2016

What can you see and do in Dexter?

As a parent or guardian, you can log into Dexter, an electronic service that allows you to give and receive important information about your child's education. You can report your child's absence or sickness directly from your computer. You can also see your child's attendance record, see their grades, read weekly letters and so on.

If you need to report your child's absence, as a parent or guardian you can do this directly in Dexter or in Dexter's own smartphone app.

How do you access Dexter?

To log in to Dexter, you need an account consisting of a username and a password. You will receive a username and password from your school when your child first starts school.

You can log in to Dexter via <https://ostersund.dexter-ist.com>.

Keep your account information secure

If you lose your login information, contact the administrator of your child's school. They will send your details to your registered address.

Data Protection Act (Personuppgiftslagen, PUL)

Information about parents and guardians is extracted from Östersund municipality records via the Swedish tax authority, Skatteverket. If one parent or guardian lives in a different municipality, we sometimes need to extract the information from a larger database covering the whole of Sweden. Records for pupils whose identity is protected are handled manually and cannot be seen in Dexter.

The commissioner for personal data in Östersund municipality's administration for children and education is Håkan Edlund, IT strategist, Administration for children and education. Tel: +46 (0)63 14 30 00

Email: hakan.edlund@ostersund.se

Allowance for possible errors

At some times of year, such as during the summer when we change academic year, set up new classes, groups and timetables, some information can occasionally be incorrect. We may also have to shut down the system for short periods. We will give you information about this in advance.

You can download this information and user manuals for Dexter in several languages at: <http://www.ostersund.se/barn-och-utbildning/grundskola/dexter.html>
