Unikum is a learning portal that the preschool is now using for planning, documentation and reviews. On this page you will find information about what Unikum is and how to use it.

## Unikum Familj

In the autumn term 2020, we began introducing a platform called Unikum in our preschools. Unikum contains the preschools' documentation and activity planning. As a guardian, you take part of the information in Unikum through the Unikum Familj app.

As a parent/guardian, you can use Unikum Familj to readily follow and be involved in what's happening at the preschool and in your child's day-to-day life, development and learning in preschool. And it's accessible via both mobile phone and computer. Unikum keeps track of documentation, information from the preschool and booking of development reviews.

Unikum can be used both via the Unikum Familj app or by logging in to the Unikum website:

[Link to the Unikum website](#)

You can already download the app and start using Unikum Familj.

## This is what you do

Step 1

The Unikum Familj app is available for download here:

- [Link to Appstore for parents/guardians with iPhone](#)
- [Link to Google Play for parents/guardians with Android](#)

The app is free.

You can also log in through the Unikum website:

- [Link to the Unikum website](#)

Step 2

Login takes place through: It depends on which login solution the municipality has chosen. Either via Mobile BankID or with a Username and Password, i.e., the same login solution as for "regular" Unikum.

In order not to lose important information, as a parent/guardian, you need to log in to Unikum Familj and accept the terms and conditions of use as well as check that your email address is correct.
